

## Nu Flow re-lines at Kloof Village Mall

**Location:** Kloof Village Mall, Kloof, Durban

**Situation:**

At Kloof Village Mall, whenever it rained water seeped from the 110mm PVC full bores on the roof into the coffee shop below.

The pipes had multiple displaced joints which allowed water to enter and flood the coffee shop.

The management of Kloof Village Mall Shopping Centre were looking for a nondestructive solution to the problem as they did not want the inconvenience, mess, noise and downtime for the coffee shop associated with traditional pipe replacement.

They turned to Nu Flow for a suitable solution.

**Solution:**

Ganga Plumbers, a Nu Flow licensee, re-lined the full bores with Nu flows pull-in-place structural liner system working from existing access points thereby causing no disruption to the coffee shop nor any structural damage to the building.

The end result is a new pipe with in the old pipe. No Mess, no chopping open, no damage to structures!

**Are you concerned about elbows & tees in pipes?**  
Nu Flow re-lining process can effortlessly get around 90 degree bends!
