

## Murray & Roberts

### Nu Flow re-lines at Murray and Roberts

**Location:** Murray and Roberts, Hertzog blvd, Cape town

**Situation:**

Water Damage Services' camera technicians were called to site and found a broken storm water pipe that had shifted joints allowing the water to seep into the stack.

Traditional plumbing was not an option as the pipe was located in a tricky position between two separate buildings. This would mean that both buildings would need to cover the costs of traditional plumbing when it was neither of their fault that the line was disrupted.

**Solution:**

Water Damage Services, a Nu Flow licensee used the Nu flow pull in place lining system to re-line this pipe without causing any damage to either building. Water Damage Services did in one day what would have taken traditional plumbing a week to do.

The end result is a new pipe with in the old pipe.  
No more leaks into any floors below!  
No Mess, no chopping open, damage to structures!
