

# UV CORE

Pipe Relining

SOUTH AFRICA™

## - Pipe relining at the speed of light -

Location:

Mercedes Benz, Bedfordview

Situation:

Nu-Flow was contracted by Mercedes Benz to conduct a CCTV pipeline inspection, unblock one stormwater line and to relined one of the main pipelines at the back of the building. Replacing the pipeline was not possible since it runs under the building and joins the main sewer system.

Solution:

Nu Flow unblock and cleaned out the blocked stormwater line using a high-pressure water jetting. Nu Flow lined the section of main line using UV cure as this method of lining is the quickest and least disruptive.

- 20 minute cure time -

- Pre impregnated liner -

- UV activated resin -

- Glass fibre re-inforced liner-

- Able to do 90° bends -

- Able to do diameter change -
